Projects

Purpose

The very successful A Child Is Missing program provides free assistance to law enforcement agencies attempting to find a missing child or elderly adult in the first few hours after their reported disappearance.

There are no existing federal social service programs that can rapidly evaluate a financial crisis situation and respond in a 24-72 hour time frame. This program will assist servicemen and women and their families during extended deployments.

South Florida residents will be better prepared through disaster preparedness and training, and will have their survivability, recovery, and resilience enhanced during future catastrophic events.

Children and families caught in the juvenile justice system benefit from top quality representation and services, ultimately reducing the juvenile crime rate and improving the quality of justice in Florida.

This Institute will establish, enhance, and expand Barry University's research capabilities and academic opportunities for minority students.

Educating and training small business owners, managers, and leaders, is essential to improving our nation's economy. The Institute engages in needs assessments and skill development programs, and has been successful in job retention and job creation in the low to moderate income areas that are served.

The Center for Community Initiatives at Barry University will offer a wide range of services to local communities, increasing the opportunity for underserved residents to receive needed assistance and access health, education, and other important resources.

This project, to create a truly effective digital system to record, share, and utilize patient data and medical information in real time, will improve patient care, save money, and serve as a cutting edge model for other healthcare delivery systems.

Updated library and technology equipment will benefit thousands of students, a highly accomplished faculty, and the surrounding community at this historic, unique and successful university.

This project will enhance educational opportunities for students going into the field of environmental design, and expands capacity at the College to accommodate students who otherwise would struggle to meet their science requirements.

The College provides initial training as well as professional development for law enforcement professionals from all over the country. This Institute is an important regional law enforcement resource.

This project serves historically disadvantaged communities and families by helping promising students attain the financial means necessary to access higher education.

The CEC will expand economic and social development services to a community in need of revitalization and residents in need of social services; it will provide an avenue for community, business, and political leaders to convene; and it will opportunity to feature energy savings and green technology in a highly economically deprived area.

To remain internationally competitive, Port Everglades undertook an ambitious expansion of its facilities, requiring widening and deepening the port. This is a reimbursement for the federal cost share.

The beaches of Broward County are chronically erosive, impacting over \$600 million a year in economic activity, 17,000 jobs, and local tax revenues. This project will help stave off erosion.

This repair work will restore the structural stability of the jetty, insuring protection of the Federal channel and the Navy facility, while also lowering periodic nourishment costs for the Federal Shore Protection Project.

If this project is feasible it would create an unlimited water supply to address both consumption and irrigation demands for years to come.

Broward County's population growth and subsequent traffic congestion has generated additional demand for public transportation. Intelligent Transportation System technology will improve mass transit efficiency, ease of use, and comfort.

The streetscape enhancements will create a more livable community by providing greater connectivity and accessibility in Fort Lauderdale's downtown neighborhoods, including improvements to public safety, traffic congestion, mass transit, and economic development.

This transformational Circulator system will increase both local and regional access to new jobs and connect to the regional rail system. The project will induce approximately \$2 billion in new development, support over 35,000 new jobs, and will concentrate commercial growth in the downtown area.

Broward County must expand mass transportation service, replacing older, energy inefficient buses with efficient vehicles to reduce costs, lower energy consumption, and improve passenger comfort and ease-of-use.

Broward County's population growth and subsequent traffic congestion has generated additional demand for public transportation. This project will ensure that there are enough easily-accessible park and ride lots geographically dispersed throughout the region to encourage the use of public mass transit.

Interoperable, reliable voice and data communications for all police and fire rescue units within Broward County will greatly improve public safety.

Southeast Florida is home to over 5.5 million people, accounts for one-third of Florida's economy, and is one of the most vulnerable regions in the United States to the impacts of climate change. This project is a necessary opportunity for local governments and state and federal agencies to collaborate on future planning.

This project furthers a multi-faceted campaign to include public awareness, consumer education and medical outreach to address racial and socio-economic disparities which exist with respect to infant mortality.

The Pompano Adult Primary Health Center provides comprehensive primary care services to uninsured and underinsured residents of northern Broward County. This expansion is necessary to keep pace with growing demand.

Healthy Beginnings assists at-risk families with pre- and post-natal early intervention services, including access to essential medical care, counseling, nutrition, and education.

This successful program provides essential prenatal care to women in small group settings, who otherwise have difficulty accessing these services.

The project will assess the effectiveness of the Quality Counts Early Care and Education Program, allowing the local stakeholders CSC, Headstart, the School District of Palm Beach County, and Palm Beach State College to collaboratively align standards, set goals for quality improvement, and take actions to improve the provision of early care and education.

This community suffers from extremely high, entrenched unemployment and lacks a significant tax base for a range of city services. Citizens constantly complain about the state of local roads, which the city lost the ability to fund over 7 years ago. Repairing city streets is essential to improving the economic climate in and around this community, especially in the creation of jobs.

These devices allow fire rescue crews to more quickly access gated communities, reducing response times during emergencies and other situations.

This project will assist the City with providing citizens with clean, potable drinking water, reduce the amount of energy needed to treat the water, and allow for a more efficient use of water resources, as well as provide a jobs boost to the area.

This project will improve sections of Martin Luther King, Jr. Blvd within a low-income community in order to increase safety, encourage redevelopment, and improve the quality of life for area residents.

This redevelopment project is the linchpin of a citywide economic development effort that will improve the environment, attract tourism, and increase business and job opportunities for area residents.

New infrastructure is needed to replace decades-old systems. This project will provide efficient, safe, reliable wastewater treatment collection, prevent a force main failure under the Intracoastal, and reduce the potential for hazardous pollution of surface and ground water.

This project will revitalize the City's traditional downtown area by rehabilitating the Cove Center, upgrading the infrastructure for over 50 businesses and spurring economic development and job creation.

This project provides significant environmental assistance as well as economic (i.e. tourism) benefits to the community, county, and state.

Solar message boards are an effective tool in crime prevention and suppression, can communicate critical information before, during and after a major event like a natural disaster, and are energy efficient.

Additional security lighting and perimeter fencing will improve park security for one of the City's busiest parks.

This project will implement electronic versions of traffic citations, creating or supporting approximately 13 jobs.

This is a regional approach to capture stormwater in a sustainable way to both reduce detrimental environmental effects on estuarine environments, as well as to provide additional drinking water to offset regional water withdrawals.

Funding for this project will allow the City of Fort Lauderdale to expand its summer youth employment program to provide positive experiential workplace learning and training opportunities for area teens during the summer months.

A hardened emergency communications facility is needed to ensure a continuity of emergency services in the event of a major event or disaster.

Necessary upgrades to enhance the current aging system, to ensure that the Police Department can maintain a high level of public safety.

Necessary upgrades to modernize the City's communications equipment, to ensure reliable communication within the City and among neighboring municipalities to maximize effective public safety.

The city recently acquired land to use as parks, which otherwise would have been subject to development. These funds will help the City develop these parks for public use.

Funding for pedestrian and safety improvements in underserved communities in Fort Lauderdale.

Completion of the Flagler Greenway and Bicycle Facility, creating jobs and improving pedestrian access and use of this area.

Ten bridges have been identified as structurally deficient and thus are in need of immediate repairs to ensure public safety and continuity of transportation infrastructure.

Necessary streetscape improvements will increase resident access to mass transit opportunities, as well as create an improved neighborhood climate for residential and commercial use.

FXE serves a vital role in meeting the aviation demands of South Florida, and has a tremendous economic impact on the regional economy, generating over 3,500 local jobs and nearly \$400 in economic impact. This Control Tower is vital to continuing safe and efficient operations at this increasingly busy airport.

Funding for the rec center and park improvements will ensure a safe and vibrant location for area youth to participate in after school, sports, educational and cultural activities.

These improvements will benefit a traditionally underserved community by connecting numerous businesses, the public school bus system, public mass transit, and local neighborhoods.

This law enforcement technology equipment is critical to the first responder and emergency operations requirements of the City.

The City needs an Emergency Operations Center for essential and comprehensive local and regional emergency management systems, and to ensure continuity of government operations and emergency response.

Stabilizing the canal banks will prevent their failure during storms and hurricanes.

The Greenway Trails will serve as an alternate transit route for pedestrians and cyclists, reducing traffic congestion and increasing public safety.

Necessary expansion of the existing Senior Services Facility, which provides extensive health, wellness, social, and recreational services to senior citizens, and is experiencing a rise in demand for its activities.

Funding would be used for the expansion of Lauderhill's small business incubator.

This project provides critical updates to the City's wastewater infrastructure, including repairs to an aging sewer system and five lift stations.

This facility will be a significant economic engine for a distressed area in Broward County, providing local jobs and boosting tourism.

Upgraded communications technology will improve law enforcement in the City.

The Green Resource Center will be a model of energy efficiency, demonstrating the benefits of "Going Green" by reducing energy consumption.

Funds will be used for renovations and upgrades to the City's water and wastewater system, which are nearing the end of their expected lifespans.

Funds will be used to expand the Northwest Focal Point Senior Center to provide additional support and therapeutic services for seniors, including special services for those with physical or cognitive impairments.

This project addresses the City's ongoing concern with post-disaster public safety by replacing current infrastructure with mast arms to improve first responder access and better traffic flow.

The Green Business Incubator will enhance and expand small business opportunities and create jobs for a significant economic benefit to both Miramar and the South Florida regional business community.

This facility is essential to providing timely and effective public safety services, including police and fire rescue, and also provides a needed economic development boost to the area.

This is critical component of the City's 10-year alternative water supply plan, which will ensure clean drinking water and preserve the sensitive environment.

The transit hub and associated pedestrian infrastructure will create opportunities for citizens to have increased access to jobs, housing, community services, recreation, and medical facilities, as well as mass transit access to other communities, cities, and counties.

This project will enhance the quality of life of the residents of Miramar, enabling easier and more efficient access to jobs, housing, community services, recreation, and medical needs through improved transportation infrastructure and investments.

This project will provide a much-needed health benefit by protecting the water supply, alleviating flooding, and ensuring adequate fire flow.

This project will create 82 jobs and set the stage for further improvements in Oakland Park, reducing blight in the City's Community Redevelopment Area.

This project is to benefit the citizens of Pahokee who need a safe and efficient place of government to address critical city needs.

This project will eliminate flooding for area residents.

Increase traffic safety and efficiency, especially during and after natural disasters and other emergencies, freeing up police and other first responders for critical needs.

These road improvements will enhance critical public safety, school, and transportation access.

Funds will enhance the City's crime prevention and detection capabilities and overall public safety.

Consolidate the city's technology and data applications into a hardened data bunker, ensuring that the City's public safety activities will not be destroyed or hampered during a hurricane or other emergency.

These traffic and pedestrian enhancements will dramatically improve mobility and safety to midtown Plantation, the central business district, and will contribute to providing a safe and efficient transportation system.

This MURT system will serve pedestrians, bicyclists, and other non-motorized traffic, easing overall traffic congestion, promoting green transit opportunities, and enhancing community links and public safety.

Modern upgrades to this outdated facility will enhance adult and youth activities and services, create or retain jobs, and promote civic environmentalism and enhance quality of life.

Upgrade City's wireless communications network to enhance law enforcement and essential government functions.

Necessary repairs to ensure clean and safe drinking water for area residents.

Project will ensure water continuity for area residents during normal and emergency conditions, and will also provide jobs for local contractors for one year.

Funds for critical law enforcement technology that will enhance public safety, improve emergency response, and reduce the city's crime rate.

This project will improve the City's water-related infrastructure, addressing critical needs in wastewater management and potable water requirements.

This project is essential to the long term environmental viability of the Lake Worth Lagoon, by improving water quality to ensure the biological integrity of the ecosystem.

Blue Heron Blvd is a vital arterial road in need of significant improvements to ensure traffic efficiency and public safety.

The current area is blighted, underdeveloped, and aging. With the redevelopment the City anticipates providing expanded unemployment and training opportunities, systematically eliminating criminal influences, and creating an attractive and unique tourist environment on the waterfront.

City streets have not been maintained in some instances for over 30 years, leading to structural devastation. With a very small general fund and extremely high unemployment, the city lacks a strong tax base to make these critical repairs without federal assistance.

Sunrise is one of the largest water providers in Broward County. This project will enable the City to utilize Alternate Water Supply sources to ensure clean drinking water for area residents.

This system will provide for greater flexibility and interoperability within the City's departments, including the Community Emergency Response Team and Fire-Rescue, enhancing public safety and services.

Essential improvements will enhance the ability to provide adequate services to the senior population.

The water utility improvements are a necessary component of the Main Street Revitalization project, which will create a new mixed-use, pedestrian-friendly, city center to improve economic development opportunities and enhance quality of life.

New buses will yield increased fuel savings and emissions reductions, as well as increased access for riders to further points outside the city.

Energy savings, extension of life-expectancy, and promotes green alternatives to transportation infrastructure.

Mass transit project to increase accessibility to area commercial, retail, and residential hubs.

This project is a major component of the Main Street Revitalization project, which will create a new mixed-use, pedestrian-friendly, city center to improve economic development opportunities and enhance residents' quality of life.

This overpass will enable adults and children to safely cross an 8-lane roadway, positively impacting traffic flow and enhancing public safety.

Public safety interoperability is necessary to provide comprehensive security.

This project promotes job skills training, crime prevention, youth development, and educational improvement to prepare youth for the 21st Century workforce.

This road connects to economic development centers, and improvements will ensure continuity and efficiency of access by residents, as well as enable the road to serve as a critical alternate to U.S. Highway 1 during emergencies.

Cross International, a Florida-based Christian relief and development agency, does incredible work around the world in support of health, education, housing and anti-poverty programs, particularly in Haiti.

The Life Launch Program provides intensive employment, life, and social skills practice (not generally provided in typical vocational training) for young adults with developmental disabilities who have exited the school system.

The Early Learning Coalition's School Readiness program is an integral piece of the overall early care and education system, serving the most at-risk children.

This project seeks to develop effective solutions for emerging patterns of youth and family violence, its causes, and consequences.

Expansion of a successful education model to an additional 20 South Florida schools, 250 undergraduate students, and 4,000 struggling school children in high-needs schools.

This project addresses critical research and service needs around the issue of juvenile crime and minority overrepresentation in the juvenile justice system, fielding a wide range of professionals to identify and develop strategies to decrease juvenile crime.

Dredging the Waterway will allow for navigation of the channel by commercial and recreational vessels. The Waterway annually transports over 700,000 tons of commercial cargo and has recreational visits by over 6.6 million people.

Dredging the Waterway will allow for navigation the channel by commercial and recreational vehicles, totally over 700,000 tons annually and 6.6 million visitors.

The expansion of research facilities will benefit FIU and its students and researchers, as well as create state-of-the-art capabilities to address Commerce Department agency missions and NOAA relevant research.

This project will help develop biosensor devices to protect military and civilian personnel from exposure to unknown toxicants.

This initiative meets critical needs in the areas of military forensic science, as identified by the Department of Defense.

The requested funding would transform FIU's Wall of Wind into the only facility in the world capable of testing a wide variety of structure types to help promote the net zero energy concept by improving energy efficiency, increasing renewable energy use, and enabling sustainability of basic resources.

Upgrading existing facilities to provide needed clinical care, research, and information technology to address to needs of underserved populations.

This project is an opportunity to reduce and eliminate costly subsidy payments and allow such funds to be recommitted to the capital costs of future projects and the rapid growth of transit and passenger rail systems.

The Minority Aerospace Training Program provides opportunities for minority students to pursue careers in military and civilian aviation.

Expansion and renovation of the Health Sciences Building will enable faculty to engage actively and continually in front-line research, student preparation for STEM-related careers, and generate funds for further research and enhanced graduate/undergraduate recruitment.

This initiative addresses a vital national need to increase the number of minority students in the communications field and address the under-representation of minorities in the communications industry.

CBJTC requires adequate facilities to maximize troop training, care, and readiness.

Completing the Florida National Scenic Trail system provides an opportunity to marry recreation and conservation, in addition to providing jobs and numerous recreational opportunities for Florida residents and visitors.

Forever Family is a unique and highly successful nonprofit organization that utilizes the power of the media to create awareness regarding foster children and teens, and help find them lasting homes.

The Lake Region Water Treatment Plant will supply clean water to the Glades communities, mitigating persistent public health, operational reliability, and fiscal concerns for the underserved Glades communities.

This project is needed to maintain adequate water supply and pressure to meet public safety needs.

Goodwill will implement a successful model to create 250 new jobs, as well as rehabilitate, train, and place annually at least 200 people into local community employment in Broward County.

The Haitian Heritage Museum facilitates activities that foster cultural diversity, enhance educational opportunities, and assist the local and regional Haitian community with social, recreational, and economic opportunities.

Hendry County is in need of communications equipment essential to the operations of the new EOC, which is the focal point during county-wide emergencies.

This project will significantly increase wastewater capacity at Airglades Airport, where current limitations prevent the development of an industrial park.

The building, constructed in 1926 and listed on the National Register of Historic Places, is currently unstable and in need of rehabilitation, preserving a major cultural piece of local history.

State Road 80 is a major agricultural, "farm to market" and freight route for east/west movement across Florida. This increased capacity will allow future development to meet county and regional needs.

This roadway is located in the fastest growing part of the County and requires immediate improvements to avoid further degradation.

This project will revitalize a blighted community in an economically-depressed area of the county, boosting commercial development opportunities and improving the quality of life of all residents.

Through streamlined access to benefits and greater financial knowledge, families build financial stability, obtain jobs, and connect to the economic mainstream. Families can purchase homes in their neighborhood, increase their consumer spending, build retirement assets, and bring tax dollars into the community.

This facility will address training and education for the energy sector, and demonstrate the convergence of emerging technologies in the development of high-wage, high-skill jobs

The JAFCO Respite Home & Family Resource Center for Children with Autism will provide the respite, therapy, training, independent-living and support services to children in the South Florida area and will establish Broward County as a national leader in working with autistic children and their families.

The Jewish Museum of Florida is the only museum that collects, preserves and interprets the material evidence of Jewish life in Florida, a state that hosts 16% of the American Jewish community, and offers essential local programs and activities for the sustainment of Jewish life in South Florida.

Safe navigation will be in jeopardy in the near future without dredging; the St. Lucie Inlet was rated as the most dangerous inlet on the East Coast.

This shore protection project protects against the effects of beach erosion; this project has a positive cost-benefit ratio and is proven to save Federal recovery after storms.

Joe DiMaggio Children's Hospital (JDCH) is the only children's hospital in Broward and Palm Beach Counties that can serve children who present the most threatening illnesses with world-class technology and a highly qualified staff of medical professionals. The hospital serves an expanding population that includes growing numbers of Medicaid-eligible patients and the uninsured, and is the safety-net hospital for thousands of underserved Floridians.

Funding will allow the Tribe to completely resurface both lanes of these roads in order to avoid a patchwork approach which leads to potholes and road deterioration, extending the life of these roads by 5-10 years.

The funding will create jobs and provide essential rehabilitation and health education services to an increasing population of senior citizens who require more services to remain in their communities.

The funding for the STS program reduces the need for long term nursing home care (typically paid for with Medicaid and Medicare funds) and allows people to live with maximum independence in the community.

This project responds to the current public health emergency that exists in African-American communities nationwide that are disproportionately impacted by the HIV/AIDS epidemic and other public health disparities. Successful implementation of this project will result in increased prevention knowledge of HIV/AIDS and other drivers of the epidemic; increased HIV testing; increased numbers of persons who know their status and are entering into treatment and care; and, ultimately, a reduction in death rates and spread of this disease.

Funds will enable youth to participate in the Naval Sea Cadet Corps during the summer months, providing them with a valuable opportunity to develop important skills and leadership ability.

Health technology upgrades and training will improve medical care and patient outcomes.

Bridging the Gap will decrease the number of girls in Florida entering the juvenile justice system and increase the number of girls adequately prepared for the challenges of the new economy.

State colleges are instrumental in providing job training and certification to many of the nation's workers. Federal investment in this program will provide for increased training in these high-demand specialty areas, as well as provide continuing education opportunities for existing law enforcement.

This project will provide capital improvements to the air traffic and navigational facilities at the airport. As outlined by the FAA, funding in FY 2011 would be used for Equipment Acquisition, Program Management, Engineering, Planning, Design, Facility, and Site Prep/Installation at the Palm Beach International Airport.

Palm Beach State College will make necessary infrastructure and equipment enhancements to expand this successful program into the remaining degree- and certificate-track courses, including health professions, biotechnology, continuing workforce education, college preparatory, and teacher professional development and certification programs. The College will priority making enhancements at its Belle Glade campus.

The Institute will house five degree and certificate programs in emerging high-growth green sector industries, providing essential job training and certification for the next generation of workers.

The Port of Palm Beach is an international gateway through which a wide variety of goods and services flow to the economic benefit of the county, state, and federal government.

The Port of Palm Beach is an international gateway through which a wide variety of goods and services flow to the economic benefit of the county, state, and federal government.

Funding will be used for purposes authorized in Section 5451 of the Elementary and Secondary Education Act. Reading Is Fundamental enhances child literacy by providing millions of underserved children with free books for personal ownership and reading encouragement from the more than 18,000 locations throughout all fifty states, Washington, D.C., Guam, Puerto Rico, and the U.S. Virgin Islands.

This program uses a nationally-recognized model to teach middle school students ways to manage conflict in healthy ways, making schools safer. Funding will enable the school district to bring this program to all 6th graders in the county's 33 middle schools.

Nearly half of new students entering Palm Beach County Schools come from families with very limited English proficiency. Many of the parents do not have the formal education or skills necessary to assist their children with their education needs in the home. Federal funding would allow the School District to expand a successful program by developing, procuring, and implementing a scientifically-based, adult English language program.

Parental involvement is linked to higher student achievement and healthy intellectual and socio-emotional development. This project targets those populations most at risk to ensure that families who need assistance are able to access proper support services.

This project is a component of the Comprehensive Everglades Restoration Plan.

This project is a component of the Comprehensive Everglades Restoration Plan.

Ensuring that sufficient water supply for environmental needs is available to the Seminole Tribe.

This project will create 162 direct jobs and 310 indirect jobs in Hendry County, as well as address major safety concerns about the high rate of accidents, injuries, and fatalities on the road.

The restoration of the Everglades is a unique historical opportunity to ensure lasting environmental sustainability and clean drinking water for millions of Florida residents.

Construction on the Herbert Hoover Dike, to protect the Glades communities from flooding.

The PACE program will reduce energy costs for local home and business owners, promote energy conservation, create new employment opportunities in the county's emerging green markets, and lay the foundation for a more sustainable economic and environmental future.

The Treasure Coast Research Park is an integral part of the County's continued economic growth, particularly in the burgeoning biotechnology industry.

In addition to direct job creation, maintaining and upgrading the airport's facilities and infrastructures ensures its continued use for a variety of commercial and recreational activities.

This program assists homeless women and families -- many of whom are victims of substance abuse, sexual or physical abuse, or mental health issues -- recover and transition into stable lives.

This successful program focuses on educating juvenile care and detention officers on how to address anger management, non-judgmental listening, and conflict resolution to avoid conflict between detention officers and youth offenders incarcerated in juvenile justice facilities

The ARISE Intervention Re-entry Program provides Washington DC juvenile justice and nonprofit staff with in-depth training and specialized skills to deal with incarcerated and high-risk youth. Mounting evidence suggests that sustained participation in structured, group activities is key to healthy developing and positive outcomes for troubled youth.

FAVACA can build on years of experience working on development projects in Haiti and can call on a huge database of volunteers and experts to assist in earthquake recovery efforts.

Completing the Florida National Scenic Trail system provides an opportunity to marry recreation and conservation, in addition to providing jobs and numerous recreational opportunities for Florida residents and visitors.

Development and training opportunities for at-risk youth and incoming students to Historically Black Universities and Colleges

Matches Department of Energy needs with the goals and aspirations of minority students looking to pursue research and scientific activities in line with national needs.

Funds to hire two scientists to conduct critical research into diseases impacting Florida citrus and vegetable crops.

Increases military vehicle protection, making the vehicle safer for the soldiers inside.

Creates a unique laboratory for "one-stop shopping" for physical and genetic analyses of biological evidence in death investigations, as well as conducting research on human genetics.

The Miller School of Medicine has already created with local communities a cost-effective health system serving 85,000 people in Haiti's Central Plateau region. The School would like to expand to assist the people of Port-Au-Prince recover from the recent earthquake.

Continuation of vital research to improve technologies to combat citrus diseases impacting Florida's \$9 billion citrus industry.

Construction of a new ARS laboratory to allow for the demonstrated need for facility improvement and expansion at the USDA Sugarcane Field Station

Funding enables scientists to continue vital research to protect and advance the Florida sugar industry, a major economic driver in the state

Youth Crime Watch mobilizes and equips youth-led movements in schools and communities in partnerships with public and private institutions to create a safer environment free of crime, violence, and illicit drugs.

Total # Projects: 179

Total Amount: \$924,636,364

Total (Local*): \$389,836,364
